▲ LIPID PANEL, STANDARD

▲ CHOLESTEROL, TOTAL

Reference Range: <200 mg/dL

HDL CHOLESTEROL

Reference Range: > OR = 50 mg/dL

TRIGLYCERIDES

Reference Range: <150 mg/dL

▲ LDL-CHOLESTEROL

mg/dL (calc)

131 H

Reference range varies across results

Reference range: <100

Desirable range <100 mg/dL for primary prevention;
<70 mg/dL for patients with CHD or diabetic patients
with > or = 2 CHD risk factors.

LDL-C is now calculated using the Martin-Hopkins
calculation, which is a validated novel method providing
better accuracy than the Friedewald equation in the
estimation of LDL-C.
Martin SS et al. JAMA. 2013;310(19): 2061-2068
(<http://education.QuestDiagnostics.com/faq/FAQ164>)

CHOL/HDL-C RATIO
Reference Range: <5.0 (calc)

▲ NON HDL CHOLESTEROL
Reference Range: <130 mg/dL (calc)

For patients with diabetes plus 1 major ASCVD risk factor, treating to a non-HDL-C goal of <100 mg/dL (LDL-C of <70 mg/dL) is considered a therapeutic option.

Report Insights

CHOLESTEROL, TOTAL

Total Cholesterol > 200 mg/dL

The level of total cholesterol circulating in the blood can help determine your risk for heart disease. The National Heart, Lung, and Blood Institute (NHLBI) considers a total cholesterol level of less than 200 mg/dL to be in the desirable range. A total cholesterol level above 200 mg/dL may suggest you have a greater risk for heart disease. Total cholesterol levels vary by age, gender, and heredity. Other cholesterol measurements, alongside patient characteristics, should be taken into consideration when determining a person's risk level for heart disease. Click here: <https://www.webmd.com/cholesterol-management/understanding-numbers> to learn more about cholesterol levels and how they matter to a person's health.

Know the Facts about High Cholesterol

Nearly 1 in 3 American adults has high cholesterol. Too much cholesterol puts you at risk for heart disease and stroke, two leading causes of death in the

United States. High cholesterol has no signs or symptoms, so the only way to know if you have it is to get your cholesterol checked. Talk to your health care team about how you can manage your cholesterol levels and lower your risk.
